01 360° Land Mapping & Virtual Tour

IDR

8,000,000

Real 360° mapping of the land, captured on-site with drone and 360° equipment, showing the current state of the property and its surroundings.

- Interactive navigation across the land, including access points, roads, viewpoints, future villa zones, surrounding environment, and main points of interest.
- Top-down master view of the project, helping investors and clients understand the full property layout, dimensions, positioning, and general land organization.
- Clear visual annotations directly inside the Virtual Tour, including project zones, villa positioning, access points, views, surroundings, and contextual information.
- Integration of the masterplan and project information to connect the existing land and future development.
- Website-ready shareable link, accessible on mobile, tablet, and desktop, for sales presentations, investor updates, website integration, or private sharing.

02 360° Villa Interior Visualization

IDR

10,000,000

360° interior visualization of selected villa spaces, created from the final renders and visual materials provided by the client's renders team.

Custom hotspots will connect the land navigation to the villa interior views, creating a smoother and more immersive project presentation. The selection of villa interiors and viewpoints will be discussed and defined with the client's team before production.
